Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

As a user and instructor of applications that make use of high-precision GPS, I **oppose** LightSquared's request (which ignores the recent independent test results) to affirm its license and its request to go forward with its plan to implement its technology. Until the conflicts with GPS are COMPLETELY corrected LightSquared should not be allowed to implement their technology. Doing so without the conflicts with GPS completely corrected will have devastating impacts on all users of high precision GPS.

Sincerely,

A handwritten signature in black ink that reads "Christopher J. Seeger". The signature is fluid and cursive, with a long horizontal line extending from the end of the name.

Christopher J. Seeger
